

How to Search for Bedrooms With a Closet Type

- From the home page in Matrix, hover over 'Search' and select the property search type (ex: Residential quick/detail, Rental quick/detail, or 'Quick' search).

- From the Matrix 'Search' page scroll down to the 'Rooms Search Type' field.

The screenshot shows the StellarMLS search interface with various filters and search criteria. A red arrow points to the 'Rooms Search Type' field, which is currently set to 'Type'. Below this field, there are several other search criteria: 'Level', 'Bedroom Closet Type', 'Room Features', and 'Room Flooring'. The 'Rooms Search' section is currently set to 'And' and 'Or' options are visible. The 'More' button is also present.

- Select the bedroom type you are searching for, then select the type of closet (Built-in, Walk-in) under the 'Bedroom Closet Type' field. If you want to search for multiple room and closet types, select the 'More' button, and another row will be added to the search. If you select 'Or' under the search, the system will look for any properties containing either of the search criteria you have selected.

This close-up screenshot shows the 'Rooms Search' section. The 'Bedroom Closet Type' field is highlighted with a red arrow, and the 'More' button is also highlighted with a red arrow. The 'Rooms Search' section is currently set to 'Or' and 'And' options are visible. The 'More' button is also present.

- Select 'Results'.

Rooms Search

Type	Level	Bedroom Closet Type	Room Features	Room Flooring ?
Master Bedroom ▼	▼	Walk-in Closet ▼	▼	▼
Bedroom 2 ▼	▼	Built-in Closet ▼	▼	▼

And Or **More**

- If you are looking for properties with no closets in a specific room, then you must select the room type and select 'No Closet' under the 'Bedroom Closet Type' field.

Rooms Search

Type	Level	Bedroom Closet Type	Room Features	Room Flooring ?
Bedroom 3 ▼	▼	No Closet ▼	▼	▼

And Or **More**

Clear 60 matches Map **Results**

- If you would like no specific closet type in a specific room but want a closet in that room, omit the 'No Closet' option, then enter both closet types, using the more option for the second closet type using the same room as the criteria with 'Or' selected.
